Automann Teams up with The Original Safety Siphon®

Dating back to the 1970's, the original product was from Australia and brought to the USA in 1980's. The goal was to provide the best, easiest and safest way to transfer liquids. Under new ownership the product offering has expanded into various lengths and accessories.

The siphon hoses use only the highest quality components like: Quality copper, industrial glass ball, stainless steel, and virgin grade resins, with no fillers, making them FDA food grade safe.

Highlights of The Original Safety Siphon offering:

- Made in the USA
- Lengths in 6 and 10 feet
- Diameters ranging from 3/8 inch - 1 inch.
- Gallons per minute ranging from 1.5 - 10.5 GPM.
- Optional shut off valves, aid in holding prime, to fill multiple containers
