Automann adds IMI Products Equal Tire Balance

Since 1973, IMI has been providing the trucking industries with innovative tire maintenance products.

In 1990 they introduced Flexx, an internal balancing compound that provides continuous balancing within the tire/wheel. It eliminates the need for wheel weight balancing and saves fleets time and money,

As a truck tire vibrates, energy is created. FLEXX absorbs this energy and the accompanying vibrations within the tire. Balancing truck tires creates less vibration, leading to less wear and tear on the truck, even tire tread wear, better fuel economy, and a smoother ride for your driver.

Installing is easy: when mounting a new tire, simply drop in a tire balancing bag of IMI FLEXX. All images, related parts and interchanges are loaded on Automann.com.

Please contact your regional sales person or customer service for additional information.

About Automann

Family-owned and customer-driven since 1994, Automann has become a leader for global distribution of heavy-duty truck and trailer parts. Automann offers an ever-expanding catalog of over 50,000 parts across 18 product categories. The company's product portfolio includes both Automann-branded products and a growing collection of leading brand names. With six strategically located distribution centers across North America, Automann collaborates with an extensive distributor network to provide garages, fleets, and end-users with quality replacement parts promptly and at exceptional value.
